Abstract

The instructions below are specifically directed at authors who wish to submit a manuscript to the Committee of the KMUTNB Int J Appl Sci Technol. They explain how to prepare your manuscript so that its appearance is clear and consistent with the other papers in the preprints. They include guidance on layout, illustrations, text style and references. They are presented exactly as your paper should appear. It is highly advised that you use this template to prepare your paper in Microsoft Word. Please send any comments or questions by e-mail to the secretariat of the KMUTNB Int J Appl Sci Technol.

Keywords: KMUTNB Int J Appl Sci Technol, Instructions, Paper

1 Introduction

The goal of this template is to achieve uniformity in the papers appearing in the conference preprints. The typography, layout and style used in these instructions are exactly the same as those you should use when preparing your paper. **No final corrections will be made by the publisher. Please bear in mind that submission of an electronic copy in MS Word and Portable Document Format (PDF) format are required. Use Adobe Acrobat/Distiller version 7 to create your PDF file.** Use a PC, not a Macintosh or a UNIX workstation. **Please give special attention to the naming of your PDF file:** The name must consist of the surname of the author e.g. Butdee.doc and Butdee.pdf. Your paper is limited to a maximum of **twelve printed pages**.

The official language of KMUTNB Int J Appl Sci Technol is English. If English is not your mother tongue, make sure that the manuscript is edited by a competent editor.

2 Identifying Your Paper

2.1 Paper title and authors

In order to follow the style of this Journal, the paper's title, authors' names and affiliations should follow the format exactly as shown above.

Do not print page numbers. The publisher will add cover pages, the table of contents, etc. Consecutive page numbers will be added by the publisher.

3 Setting up Your Paper

3.1 Text area

Your manuscript must fit within the required margins. The paper size is 18.4 cm in width and 26 cm in height or use this template. Set your margins for the pages at 25 mm for the top and 20 mm for the bottom margins, 10 mm for left, and 10 mm for right. The first page and all **uneven** pages should have a **right hand** layout: right margin at 10 mm and left margin at 10 mm. The **even** pages should have a **left hand** layout: left margin at 10 mm and right margin at 10 mm. Centering of text sections refers to those margins.

3.1.1 Title

Put the title directly under the top margin. The title should be in 12-point **Times New Roman Bold** with left-justification. Use capitals as indicated in the title of this example. In the Title, the first letter of the first word and of all major words must be capitalized, major words must start with a capital. The authors' names should be typed in 10-point **Times New**

Roman Bold Italic and the authors' affiliations must be typed in 10-point *Times New Roman Italic*.

3.1.2 Abstract

Your abstract should not exceed 100 words. It should provide a brief summary of the contents of your paper. The body of the abstract should be typed in 10-point Times New Roman.

3.1.3 Keywords

Leave one line between the abstract and the keywords. The Keywords should be typed in 10-point Time New Roman and each keyword must be separated with a comma. The author must provide at least three keywords.

3.2 Font and line spacing

Papers must be prepared on MS-Word running on Microsoft Windows with 10 points, Times New Roman. The same font can be used in figures. **The usage of other fonts will be a reason for rejection.**

3.3 Headings and heading spacing

We recommend using no more than three levels of headings, as indicated in this instruction as Heading 1, Heading 2, and Heading 3. For example,

1 Heading 1

1.1 Heading 2

1.1.1 Heading 3

Avoid loose Headings to appear at the page bottom.

4 Text

4.1 Terminology and symbols

The nomenclature must be appeared at the end of the paper (if included). The units are highly recommended for this journal.

4.2 Style

The following list summarizes several important points of style to keep in mind when preparing your paper for the KMUTNB Int J Appl Sci Technol

- Use **bold** for emphasis, but keep its use to a minimum. Avoid using underlining in your paper.
- Use a consistent spelling style throughout the paper (US or UK).
- Use single quotes.
- Use %, not percent.
- Do not use ampersands (&) except as part of the official name of an organization or company.
- Keep hyphenation to a minimum. Do not hyphenate 'coordinate' or non words, such as 'nonlinear'.
- Do not end headings with full stops.
- Do not start headings at the foot of a column or with only one line of text below; put the heading on the next column or page.
- Leave a single space after all punctuation marks.

4.3 Mathematic text and equations

Equations should be justified to the left margin and numbered at the right margin. Leave a single space before and after the equation, as indicated in the Equation (1) below,

$$\frac{\partial U}{\partial t} + \frac{\partial E}{\partial x} + \frac{\partial F}{\partial y} = Q \quad (1)$$

Use the 10 points, Times New Roman for the equation, e.g. italics for variables (*u*), bold for vectors (without arrows) (**u**), bold italic for variable vectors (***u***), and capital bold italic (***U***) for variable matrices. Use *i*th, *j*th, *n*th, not *i*th, *j*th, *n*th. The order of brackets should be {[()]} , except where brackets have special significance.

4.4 Lists

Single space list items with no extra space between the lines needed. Each item should be marked with a solid bullet '•' or with an Arabic numeral followed by a full stop, e.g. 1., 2., 3., and so on. Be consistent in marking list items.

Refer to Section 4.2 for an example of a bulleted list. The following is an example of a numbered list:

1. For complete or near complete sentences, begin with a capital letter and end with a full stop.
2. For short phrases, start with lower case letters and end with semicolons.
3. Do not capitalize or punctuate single items.
4. Use a colon to introduce the list.

6 Conclusions

This paper explains the authors' instruction for preparing a manuscript for submission to the KMUTNB Int J Appl Sci Technol

Acknowledgments

We extend our sincere thanks to all who contributed to preparing the instructions.

References

The relevant works must be cited and listed as references at the end of the paper, in **order of citation**.

Number the references chronologically: [1] [2] [3]. To cite the references in the text body of the paper, use the number in square bracket, e.g. [1], [2], [1]–[3]. The reference list should be set in the same typeface as the body of the text. Each citation should be followed by a full stop. Examples of references to journal articles and papers, technical reports, proceedings, and books are illustrated as follows:
